

N O V E M B E R

Sunday	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday	
			All needle leafed trees are evergreen- Right? Wrong! Do some research on the tamarack pine and other larches.			Collect or draw some rocks and pebbles. Why are river pebbles smooth? Are they different colors?	
	When is the first snow? Sometimes in my area years it is in October, but many times it is in November. When is the first snow in your area? Do you get snow?						
					Can you find dry weeds from the previous season? There are books on how to identify dried weeds. Perhaps you could use them to identify your weeds. You can also sketch them here.		
			Many animals are going back into hibernation. What animals hibernate in your area? Where do they hibernate? In reptiles, it is called brumation. Find out the difference.				
	Are all the insects gone? Find out where they are and make a guess as to when they will return.					What are the clouds like today? Draw and observe multiple days and note the changes. What kind of clouds are they? Do some research.	

NATURE JOURNAL CALENDAR

See what's happening in the month of November. Then take notes about what's happening in your backyard here in this calendar!
