

# SEPTEMBER

Sunday	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday
				Look around you. What kinds of berries do you see? Watch to see if you can sketch something eating them.		
		It's time for apples! What else is ready in your area? What fruits and produce do people grow in your area?				
Draw a color palette for September here in the calendar. Include the colors of the sky, leaves, and animals.					Do you have many snakes and lizards in your area? Are there more snakes species or lizard species in your area? There are very few lizards in my area, but there are many snakes.	
	When do monarchs come through your area? Do monarchs come through your area?					How do you tell the difference between monarchs and their mimickers, viceroy? Why would the viceroy want to look like a monarch?
			Trees have probably started to change color. Which ones change first? Are different kinds of trees different colors? Which trees are what colors?			

## NATURE JOURNAL CALENDAR

See what's happening in the month of September. Then take notes about what's happening in your backyard here in this calendar!
